

Outdoor Strong!

The frames are CNC cut from a marine grade 18mm Baltic Birch plywood. This plywood is engineered for the outdoors! They are assembled using exterior grade adhesives and stainless-steel fasteners.

Interlaced polypropylene webbing provides the support in the seat. Sheet and strap webbing serves as support in the arms and backs.

Outdoor swivels are powder coated or epoxy coated for durability. All bearings are stainless steel. Mechanisms are salt tested for 500 hours! Outdoor casters are zinc plated to help prevent corrosion.

Seat cushions are made of High Resiliency polyurethane foam with a fiber wrap in a 3-layer SMS (spun bond/melt blown/spun bond) waterproof tick designed for medical use. The tick contains 6% UV additive. Seams are sonic welded by radio frequency to eliminate needle holes.

Seat deck, arm and back poly are made from Reticulated foam. An open cell foam designed to allow moisture to escape and air flow to maximize drying! Reticulated foam has anti-microbial additives to help prevent mold and mildew.

LIMITED WARRANTY: This limited warranty covers all defects in workmanship or materials of Atelier Home's Outdoor Living Collection for the original owner.

FRAMES: 5-years

SPRINGS: 2-years

CUSHIONS: 2-years

MECHANISMS (sleeper and swivel gliders): 3-year warranty
